Dear Property Owner,

In conjunction with the **North Co. Rd. 25A, Hilltop & Fletcher** sewer projects, the Miami Co. Sanitary Engineers are offering an internal waste water piping evaluation. This evaluation will be performed at no cost to the property owner.

The purpose of the evaluation is to insure that only sewage and gray water will be discharged into newly constructed central sewer collection system and that clear water is properly diverted to an approved point of disposal.

All properties seeking assistance through the **Miami County Economic & Community Development Department's Sanitary Sewer Tap-in & Service Line Installation Assistance program** are **required** to have this evaluation. For all other properties, it is not required but should the property owner choose to have it conducted, will provide valuable information when obtaining bids from local plumbers to conduct the sewer hook-up. Having this information prior to getting a plumber onsite to conduct the hook-up will help to eliminate some of the unforeseen costs that property owners often incur when the plumber encounters additional internal plumbing work that needs to be conducted.

Inspection dates as follows:

North County Rd. 25A – March 15, 2010 thru April 15, 2010

Hilltop – April 15, 2010 thru May 15, 2010

Fletcher – May 15, 2010 thru August 1, 2010

These inspections will be performed by Certified Plumbing inspectors from the Miami County Health District. A copy of the report will be sent to the Miami County Sanitary Engineers, the Miami County Economic Development office and the property owner. Inspections will be conducted **Monday thru Friday from 9:00am to 3:00pm.**

Please contact the **Miami County Health District @ 937-440-5451 or 937-440-5450** to schedule your internal wastewater plumbing evaluation. Again, this evaluation is **required** for any persons seeking assistance through the **Sanitary Sewer Tap-in & Service Line installation Assistance program** and highly recommended for all others.
